

Message from Brother Antonio LÓPEZ's sister

I am sending you the e-mail my sister sent me explaining at 0 hour (Spain), March 19.

I have just received a phone call from my brother Antonio López García-Nieto. He was able to call with a telephone from an help organization.

He is on the Island of Tanna, in Lowanatom. Physically, he is well even if he is very much affected and devastated because of the situation they went through and in which they find themselves.

The school where they live is completely destroyed; only a few walls remain. They will need a lot of help

As he told me: "At least everyone in the mission is alive".
